

Taxonomical updates in The Scorpion Files for Euscorpidae (2008 →)

In November 2020, Frantisek Kovarik and co-workers presented a major revision of the family Scorpidae. The family status and the relation with the family Euscorpidae has not yet been finally understood, but in this paper the authors use the family group name to be consistent with its most recent usage in the literature. I'm following this decision and have reinstated Scorpidae as a family in The Scorpion Files. All taxa belonging to Scorpidae are now transferred from Euscorpidae. More information can be found in the article:
