

Taxonomical updates in The Scorpion Files for Scorpionidae (2008 →)

Taxa	Status	Distribution	Comments	Reference
<i>Aops</i>	New genus	Australia	The family Urodacidae was abolished by Soleglad, Fet & Kovarik in 2005 and the subfamily Urodacinae was transferred to Scorpionidae. Volschenk & Prendini have not accepted this decision and retained the family Urodacidae (and placed the new genus and species in this family because of its close relationship to <i>Urodacus</i>). The taxonomy of The Scorpion Files follows Soleglad & Fet (2005), and I have here listed <i>Aops</i> in Scorpionidae. This is formally not correct, but is the best choice in the current situation until a new revision on higher scorpion systematics is published.
