

Taxonomical updates in The Scorpion Files for Scorpiopidae (2008 →)

In November 2020, Frantisek Kovarik and co-workers presented a major revision of the family Scorpiopidae. The family status and the relation with the family Euscorpiidae has not yet been finally understood, but in this paper the authors use the family group name to be consistent with its most recent usage in the literature. I'm following this decision and have reinstated Scorpiopidae as a family in The Scorpion Files. More information can be found in the article:
